6. The online cake ordering system allows users to browse a variety of cakes by category, flavor, and occasion, complete with detailed descriptions and images. Users can register, log in, and manage their orders through a personal dashboard. The ordering process includes selecting a cake, customizing options like size and message, entering delivery details, and making secure payments via an integrated payment gateway. Admins can manage cake inventory, track orders, and handle user accounts through an admin panel. Users receive order confirmation emails and can track delivery status. The website is fully responsive, providing a seamless shopping experience on all devices. Buy a Cake is a portal which allows admin in developing counters to advertise and sell their cake. This would permit rural communities to make their wares available to the rest of the world. The proposed system is to develop the website for cake store. User can buy the nearby cake available in app. An E Com App is a portal which allows admin in developing products to promote and sell their goods. This would permit rural communities to make their wares available to the rest of the world.

OUTPUT:

7. The online beauty parlour appointment booking system allows users to browse available services, view stylist profiles, and check appointment slots in real-time. Users can register, log in, and manage their appointments through a personal dashboard. The booking process includes selecting services, choosing a stylist, selecting a date and time, and making secure payments via an integrated payment gateway. Admins can manage service offerings, stylist schedules, and user accounts through a comprehensive admin panel. Users receive appointment confirmation emails and reminders, with the option to reschedule or cancel appointments through their dashboard. The website is fully responsive, ensuring an optimal experience on all devices. This website helps customers to search for any beauty parlour and book appointments as they preferable date and time.

Have reservations calendar

- **Create, edit, and cancel reservations**
- **Lockout unavailable hours**
- **Get the crucial information for each date on the calendar**

Customers' personal account page

- **Upcoming reservations**
- **Reservations history**
- **Personal data**

Salon manager and staff member in order to control and manage reservations.

- Upcoming reservations
 - Reservations calendar
 - Add reservation
 - Edit reservations
 - Send an SMS or call to the customer
 - customers leave feedback about their experiences and learn from their suggestions.
- Accept online payments as a whole payment or as a partial deposit with Stripe or PayPal or with one of the available payments
- Require full payment or a deposit
 - Accept PayPal or Stripe
 - Automatic cancellation of unpaid reservations
 - We have more than twenty different payments platforms integration add-ons

OUTPUT:

8. In an effort to streamline the appointment process and enhance patient experience, MedCare Hospital has developed an online appointment booking system. This platform allows patients to book appointments with doctors from various specialties at their convenience. Key functionalities include user registration and login, browsing available doctors and appointment slots, booking and canceling appointments, and receiving appointment reminders via email or SMS. Patients can also view their appointment history and update their personal details. The system ensures data security and compliance with healthcare regulations to protect patient information. This online service aims to reduce wait times, minimize paperwork, and provide a seamless experience for patients and healthcare providers alike. This website helps the patient to search any hospital and book appointments as they prefer.

- Search Module
- Appointment Booking
- Check-in form Submitting

- Appointment management
- Schedule a timing
- Past appointment Management

Admin Features

- Manage appointments
- Manage doctors
- View Appointments statistics
- Rating Details

Patient Features

- Signup/Login.
- Can choose and book an appointment at the flexible time and date.
- Can search for doctor according to specialty and location.
- Can write reviews about the doctor and can select doctors according to otheruser feedback.
- Can access all previous check-in details and medical past appointment

User

- User Registration
- User Login
- Search Location wise
- View Hosptial list
- Book Appointment
- View status
- View google map for single hospital

Hospital

- Hospital Registration
- Hosptial login
- Create hostpital details
- Update details
- Update location

9. TechSavvy, a leading retailer of electronic gadgets, has launched an online shopping platform to provide customers with a seamless and convenient shopping experience. The website features a wide range of products, including smartphones, laptops, tablets, and accessories, all categorized for easy browsing. Key functionalities include user registration and login, product search and filtering, detailed product descriptions and reviews, secure payment options, and order tracking. Customers can add items to their cart, create wish lists, and receive personalized recommendations based on their browsing and purchase history. The platform also offers exclusive online discounts and promotions, ensuring customers get the best deals on the latest gadgets. The core of an online shop is the product catalogue and the cart. The users browse products which are grouped in categories and add the desired ones to the cart. Next, there is transaction handling, which in its simplest form consists in the order being sent via e-mail to the seller, but most often it takes the whole buying process through separate order statuses.

❓ Products should be logically categorized, with the most popular categories listed first. Display all the available categories for shopping on the home page.

❓ Display all the subcategories on the home page, that are associated with any particular item.

❓ Admin has the authority to add new particulars to the items list whenever needed.

❓ Permission to the administrator to remove items, anytime.

❓ Allows the admin to modify the price of each item, whenever required or felt like.

❓ Admin has the authority to update the description of each item.

2 Permission to the admin to view information about each customer who checkouts the items list.

Use Cases

1. Visit a site
2. Login
3. Search for Items
4. Check Availability of Items
5. Add Items to Shopping Cart
6. Edit Items in the Shopping Cart
7. remove Items from the Shopping Cart
8. Check out the Shopping Cart
9. Check Order Status
10. Browse Order History
11. Display Item Details
12. Logout
13. Leave a site

10. StyleHub, a premier online fashion retailer, introduces its comprehensive e-commerce platform designed to cater to fashion enthusiasts. The website offers an extensive collection of clothing, footwear, and accessories for men, women, and children, with categories such as casual wear, formal attire, and seasonal collections. Key functionalities include user registration and login, advanced search and filtering options, detailed product descriptions with high-resolution images, customer reviews, and size guides. The platform supports secure payment methods, order tracking, and an easy return and exchange policy. Customers can create wish lists, receive personalized style recommendations, and enjoy exclusive online discounts and flash sales. StyleHub aims to provide a seamless and enjoyable shopping experience, keeping users up-to-date with the latest fashion trends. The core of an online shop is the product catalogue and the cart. The

users browse products which are grouped in categories and add the desired ones to the cart. Next, there is transaction handling, which in its simplest form consists in the order being sent via e-mail to the seller, but most often it takes the whole buying process through separate order statuses.

- The key to helping customers find the products they need quickly is to offer a user-friendly navigation system.
- Products should be logically categorized, with the most popular categories listed first.
- Display all the available categories for shopping on the home page.
- Display all the subcategories on the home page, that are associated with any particular item.
- Admin has the authority to add new particulars to the items list whenever needed.
- Permission to the administrator to remove items, anytime.
- Allows the admin to modify the price of each item, whenever required or felt like.
- Admin has the authority to update the description of each item.
- Permission to the admin to view information about each customer who checkouts the items list.

Use Cases

- 2. Visit a site**
- 2. Login**
- 3. Search for Items**
- 4. Check Availability of Items**
- 5. Add Items to Shopping Cart**
- 6. Edit Items in the Shopping Cart**
- 7. remove Items from the Shopping Cart**
- 8. Check out the Shopping Cart**
- 9. Check Order Status**
- 10. Browse Order History**
- 11. Display Item Details**
